

Project Update

Peter Lougheed Centre, Calgary

(Renovations -Vascular Surgery and Women's Health)

Overview

- The 2018-2022 Capital Plan has allocated \$4.1 million to complete renovations at the Peter Lougheed Centre (Vascular Surgery and Women's Health Units).
- These projects will deliver a patient-centred care model to improve access and quality of care that will meet current Alberta Health Services care standards.
- The project will also facilitate the transfer of improvements to services provided by the impacted Pediatrics and Hemodialysis departments.
- The redevelopment encompasses the consolidation, renovation and expansion of services to the existing Vascular Surgery and Women's Health programs.

Redeveloped Acute Care Services

- Vascular Surgery: Ambulatory Care
- Vascular Surgery: Inpatient/ Step Down Unit
- Vascular Surgery: Surgical Suite
- Women's Health: Triage / Labour and Delivery
- Women's Health: Antepartum
- Women's Health: Postpartum
- Women's Health: Neonatal Intensive Care
- Impacted Department: Hemodialysis
- Impacted Department: Pediatrics

Construction Update

- There are three phases to the redevelopment:
 - Phase 1 - Redevelopment of impacted departments (completed April 2014);
 - Phase 2 - Vascular Surgery and Hybrid Operating Rooms (completed September 2015); and
 - Phase 3 - The Women's Health Unit on Level 3, (completed March 2018).
 - The Neonatal Intensive Care Unit Is fully operational.
 - New Labour and Delivery Units – Construction is complete and the nits have been turned over to Alberta Health Services for operational commissioning.
 - Work on the elevator lobby is nearing completion.

Next Steps and Upcoming Activities

- Alberta Health Services completes operational commissioning and patient use.

May-July 2018
