Project Update  
High Prairie Health Complex

Overview
- The construction of the new $228.3 million High Prairie Health Complex is scheduled for completion late 2016. The project will include a wide-range of health services including acute care, continuing care, primary health care and community health programs.
- When completed, the new health complex will replace the existing health complex and continuing care facility (J.B. Wood Nursing Home).
- The new High Prairie Health Complex will include a computerized tomography diagnostic room which will allow for a new service to be provided in the community.
- The facility's design and structure will allow for expansion to meet future health needs.

Hospital services
- Acute care
- Emergency department
